AfyaPlus Health - Access Control Policy

1. Purpose

This policy defines who may access AfyaPlus systems and data, and how access is granted and removed.

2. Access principles

Access is granted on a least-privilege basis: staff receive only the access their role requires.

Access to patient data is restricted to clinical staff involved in that patient's care.

All access is tied to a unique user account. Shared or generic accounts are not permitted.

3. Granting access

New access requests must be approved by the staff member's line manager and the IT Administrator before being granted.

4. Removing access

When a staff member leaves, their accounts are disabled within 24 hours. Dormant accounts unused for 90 days are automatically suspended.

5. Review

Administrators review all access rights during the monthly access-review audit and the quarterly security audit, removing any access that is no longer needed.

6. Multi-factor authentication

Multi-factor authentication is required for all remote access and for any account with administrator privileges.
